HYDROGEN HOSE

Patent Number: JP2002213659
Publication date: 2002-07-31
Inventor(s): YAMAGUCHI HIROSHI;; KAMEDA NOBUAKI
Applicant(s): TOYODA GOSEI CO LTD
Requested Patent: ☐ JP2002213659
Application Number: JP20010009819 20010118
Priority Number(s):
IPC Classification: F16L11/11; B32B1/08; B32B27/28
EC Classification:
Equivalents:

Abstract

PROBLEM TO BE SOLVED: To provide a hydrogen hose 10 which uses resin for a lighter weight and durability at vibration points and having superior hydrogen permeability resistance and water resisting property.

SOLUTION: The hydrogen hose 10 comprises an inner layer 12, facing a flow passage 10a and formed of a first resin material having an equilibrium water absorption rate of 0.1% or less at a temperature of 20 deg.C and humidity of 65%, an intermediate layer 14 laminated on the inner layer and formed of an ethylene vinylalcohol copolymer (EVOH) and an outer layer 16 laminated on the intermediate layer 14 and formed of a second resin material, having an equilibrium water absorption rate of 0.7% or more at a temperature of 20 deg.C and humidity of 65%.
